EDUCATION

University of Alberta

Bachelor of Science, Computing Science

Sept 2021 – May 2025

Edmonton, AB

WORK EXPERIENCE

Software Developer

Employment | React, Node.js, Express, TypeScript

Sep 2024 – Dec 2024

- Engineered and deployed scalable full-stack features including OAuth authentication and job workflows, supporting **100+ users** and **200+ job listings** in production.
- Developed RESTful APIs and optimized MySQL schemas, improving data retrieval performance by **30%**, and implemented CI/CD pipelines with GitHub Actions to reduce manual deployment effort by **40%**.
- Collaborated in a **7-person Agile Scrum team** across sprints, delivering **15+ features** with comprehensive Cypress end-to-end testing to minimize post-deployment defects.

Undergraduate Teaching Assistant

CMPUT 366 (AI Search and Planning), University of Alberta

Jan 2025 – Apr 2025

- Supported **150+ students** through labs and tutorials on AI search algorithms, state-space planning, and problem-solving techniques.
- Evaluated assignments and provided structured technical feedback, strengthening student performance and communication of complex concepts.

PROJECTS

Finance RAG Pipeline - SEC Filing Q&A System | Python, LangChain, Qdrant | GitHub

May 2026 – Aug 2026

- Built a **retrieval-augmented generation** system for SEC EDGAR filings (Apple, Microsoft, Amazon, Google, Nvidia) with semantic chunking, **GPT-4o-mini**, and a Streamlit chat/evaluation interface.
- Implemented **hybrid retrieval** (BM25 + vector search with **RRF** reranking) on persistent **Qdrant Cloud** storage, and evaluated answer quality with **RAGAS** metrics tracked in Weights & Biases.

AI Skill Gap Analyzer | Python, FastAPI, React, NLP, Docker | GitHub

Feb 2026 – Apr 2026

- Built an end-to-end NLP application in Python with FastAPI that compares resumes to job descriptions, producing a **weighted match score (0–100)** with detailed skill-level breakdown.
- Implemented skill extraction using **spaCy** noun chunks and mapped to a custom taxonomy of **217 skills** via **1,400+ alias entries**.
- Designed semantic matching pipeline leveraging **BAAI/bge-small-en-v1.5 embeddings and cosine similarity**, with memoized caching for latency reduction.

Nexus - Distributed Social Networking System | Django, PostgreSQL, Docker | GitHub

Mar 2025 – May 2025

- Designed and implemented a decentralized social network with federated nodes enabling **cross-server communication via REST APIs**.
- Containerized and deployed services with Docker and configured CI/CD workflows using Github Actions, improving deployment consistency and system scalability.

SKILLS

Programming Languages: Python, Java, C, JavaScript, TypeScript, SQL

AI / ML: TensorFlow, LangChain, spaCy, Scikit-learn, sentence-transformers, RAGAS, NumPy, Pandas

Frameworks & Libraries: Django, React, Node.js, Express, Bootstrap, FastAPI

Databases: MySQL, PostgreSQL, MongoDB, Firebase, Qdrant

Testing & Automation: Selenium, Cypress, Espresso

DevOps & Cloud: Docker, CI/CD, AWS, IBM Cloud

Tools & Systems: Git, GitHub, Linux/Unix

AWARDS AND CERTIFICATES

- Advanced Certificate Programme in AI, ML and DL** – IIT Delhi EE Dept. (Oct 2025 – Jul 2026)
- DeepLearning.AI TensorFlow Developer Certificate** (2025)
- University of Alberta Undergraduate Leadership Award** (2023)
- Microquest Leadership Award in Computing Science** (2023)
